

TECHNOLOGICALLY ADVANCED

Parryware, has launched its sustainable range of waterless urinals named **Astute Waterless Urinal**. The touch-free urinals are designed to perfection giving an eco-friendly twist to your bathrooms by using negligible amount of water. This range comes in a complete set including the blue seal and a unique eco-trap. Use of the special blue seal liquid in the outlet trap (which is lighter than water) prevents any bad odours being released from the waste-line, thus qualifying it into a hygienic product. For maintenance, the urinal needs to be wiped just once on a daily basis. This range fulfills the pre-requisites of a sustainable sanitaryware by saving tremendous quantity of amount of water and maintaining super hygiene. Urinals being a functional product, the Astute Waterless Urinal comes with a concealed outlet retaining the aesthetics alive. This urinal with integrated bottle trap and at mid-economic range makes it a great fit for the modern-day sustainable and eco-friendly necessities.
