

## Products

### Sanitary Fittings

GROHE, one of the leading manufacturers and supplier of sanitary fittings, has recently launched its new Rainshower SmartControl 360 shower system. The new innovative controls offer direct intuitive spray-pattern selection with a personalised volume setting and memory function. Furthermore, the GROHE SmartControl technology gives an option to users to select their preferred spray pattern and adjust the water flow as desired.

### Flooring Solutions

Delhi-based architectural firm JBA has recently completed a flooring modification of a retail store. As per the client's requirement, the firm converted the floor from white marble to Retroplate Concrete Polishing System with Dye. Retroplate gives the benefit of stabilising the colour and high gloss finish of the floor. Besides, it provides a low maintenance floor solution that improves with regular cleaning and enhances the floors life expectancy. They are ideal for industrial, institutional, residential, industrial, office concrete floor projects, etc.

### Slim Wash Basins

Parryware, India's contemporary bathroom solutions brand, has come up with its range of super slim wash basin 'In-Slim'. The design of the washbasin fulfills the pre-requisites of space-saving trend and gives a perfect mix to the surface treatment and creates patterns with

a fine definition. The surface pattern is partly decorative and partly functional as they prevent objects from slipping and leaving

stains. In-Slim's unique aesthetic allows tight radii of 4-5 mm which has wafer-thin walls, economises on space, lightweight and even more sustainable. The range offers two circular and two square shape table top forms with varied size.

### Innovative Designs

VitrA, one of the world's leading bathroom solutions brands of Eczacibasi Building Products Division in Turkey, has introduced a new range of colourful washbasins in different shapes and colours.

The Water Jewels Series was created by the Italian designer Matteo Thun in collaboration with the VitrA Design Team. This series artfully showcases the designs of ceramic washbasins finished with brilliant metallic coatings that drew inspiration from traditional Turkish craftsmanship.

This collection's seemingly simple form and function are enhanced with PVD coatings, which remains corrosion-free and scratch-resistant. The basins are available in gold, copper, platinum and traditional white gloss.
